INDEPENDENT TESTING & INSPECTION SERVICES

Registered Professional Engineer on Staff

Primary Services Include:

- **Nondestructive Testing** for the power generation, construction, fabrication and manufacturing industries. Radiography (RT), Ultrasonics (UT), Magnetic Particle (MT), Liquid Penetrant (PT), Eddy Current (ET), Leak Testing (LT), and Visual (VT) test methods. ASNT Level III services all methods.
- **Structural Steel Special Inspections** in accordance with IBC code requirements including welding, high strength bolts and spray applied fire proofing. AWS and ICC certified inspectors.
- **Welding Technology** including welder qualifications/certifications, procedure qualification testing (PQR), and consulting services including WPS preparation. SMAW, FCAW, GTAW, GMAW, SAW processes to AWS, ASME and related Codes.
- **Physical/Mechanical Testing** including proof loading, ultimate load testing, ASTM testing, rubber, plastics, metals, pressure, flow and burst testing to 25,000 psi, tensile, compression, shear and flexural tests.

Our promise is prompt scheduling, knowledgeable certified technicians, calibrated test equipment and inspections of the highest quality. We guarantee your complete satisfaction. All laboratory and field personnel are subject to periodic audits for compliance with our Quality Manual and procedure requirements. In addition, management reviews all reports before final issue.
